1. Purpose

The add-on will be very useful if you distribute goods, which are measured in units other “one item”. For example, if you sell fabric measured in linear feet or flour in pounds.

The screenshot shows the Teleport online e-commerce website. The header includes the logo 'Teleport online e-commerce mechanics' and navigation links for 'My Account', 'empty' (shopping cart), and 'Knowledge Base'. Below the header are menu categories: 'SERVICES', 'COMPANY', and 'PRODUCTS'. The breadcrumb trail reads 'Home > Service Products > Rent-a-Geek'. Three product categories are displayed: 'CS-Cart Addons', 'CS-Cart Software', and 'Service Products'. The main product page for 'Rent-a-Geek' is shown, featuring a product image of a man pointing at a screen. The product details include the name 'Rent-a-Geek', code 'rent-geek-srv', and a price of '\$35.00 / Hour'. A red arrow points to the unit 'Hour' with the text 'Customer see unit of your product at frontend'. Below the price, it shows 'Price in Credits: 35 Credits' and a quantity selector set to '1' with an 'ADD TO SHOPPING CART' button.

Add-on lets you add a product unit (kg, m, h) and display unit next to the price on the detailed product page with a [price] / [unit] format.

2. Installation

2.1. Standard installation procedure

- a. Download add-on archive file.
- b. Place archive into the root directory of your web site.
- c. Unpack archive at the site root directory.
- d. Make sure that admin and customer add-on skins appear at the active skin directory. You may need to move add-ons skins from default skin directory to the active skin directory.
- e. Login to the administration panel, go to the "*Administration*" → "*Add-ons*" and click "*Install*" link next to the add-on name.

2.2. Simplified installation procedure

- a. [Download free "Addon Wizard"](#) CS-Cart add-on and install it in a standard way.
- b. Install all other add-ons from "Addon Wizard" interface in a few mouse clicks.

3. Usage

- For the first, choose product you need to have measurement units. Go to the “*Products*” → “*Products*” at the main menu of the administration area and select product.
- Then go to the “*Add-ons*” tab and find “*Product units*” header.
- Fill out “*Unit*” field with desired measurement unit.
- Click “*Save*” button at the bottom left corner of the page.
