# 1. Purpose

The add-on locates customers by their IP-address and pre-fills profile information with their Country, State and City. Fewer fields to fill out while registration - more likely an order will be placed.

Company

City **Pre-fills location data of your new customers while registration process**

Country  State/province

In addition, block manager of your administration panel provided with new block "GEO IP". This block may be used at any page. It informs customer with Country, State and City the add-on locates and allows location to be changed.

The screenshot shows the header of the Teleport online website. At the top right, there is a breadcrumb trail: [Russian Federation](#) > [Tomskaja oblast'](#) > [Tomsk](#). Below this, there are three main navigation blocks: "My Account" with a person icon, "Locate customers by their IP address" with a red arrow pointing to the breadcrumb trail and a shopping cart icon labeled "empty", and "Knowledge Base" with a gear icon. The website logo "Teleport online e-commerce mechanics" is on the left. The bottom navigation bar includes "SERVICES", "COMPANY", and "PRODUCTS".

## 2. Features

- Allows use *maxmid.com* base for all countries. By default it is used free lite version of cities base, but you can purchase and install full version of base from *maxmid.com*.
- Allows use *geoipbase.ru* service for Russian and Ukraine cities. If service is not available *maxmid.com* base will be used.
- Pre-fill new customer's information with their locations.
- Add new breadcrumbs-style block for block manager to display customer location.

## 3. Installation

### 3.1. Standard installation procedure

- a. Download add-on archive file.
- b. Place archive into the root directory of your web site.
- c. Unpack archive at the site root directory.
- d. Make sure that admin and customer add-on skins appear at the active skin directory. You may need to move add-ons skins from default skin directory to the active skin directory.
- e. Login to the administration panel, go to the "*Administration*" → "*Add-ons*" and click "*Install*" link next to the add-on name.

### 3.2. Simplified installation procedure

- a. [Download free "Addon Wizard"](#) CS-Cart add-on and install it in a standard way.
- b. Install all other add-ons from "Addon Wizard" interface in a few mouse clicks.

## 4. Configuration

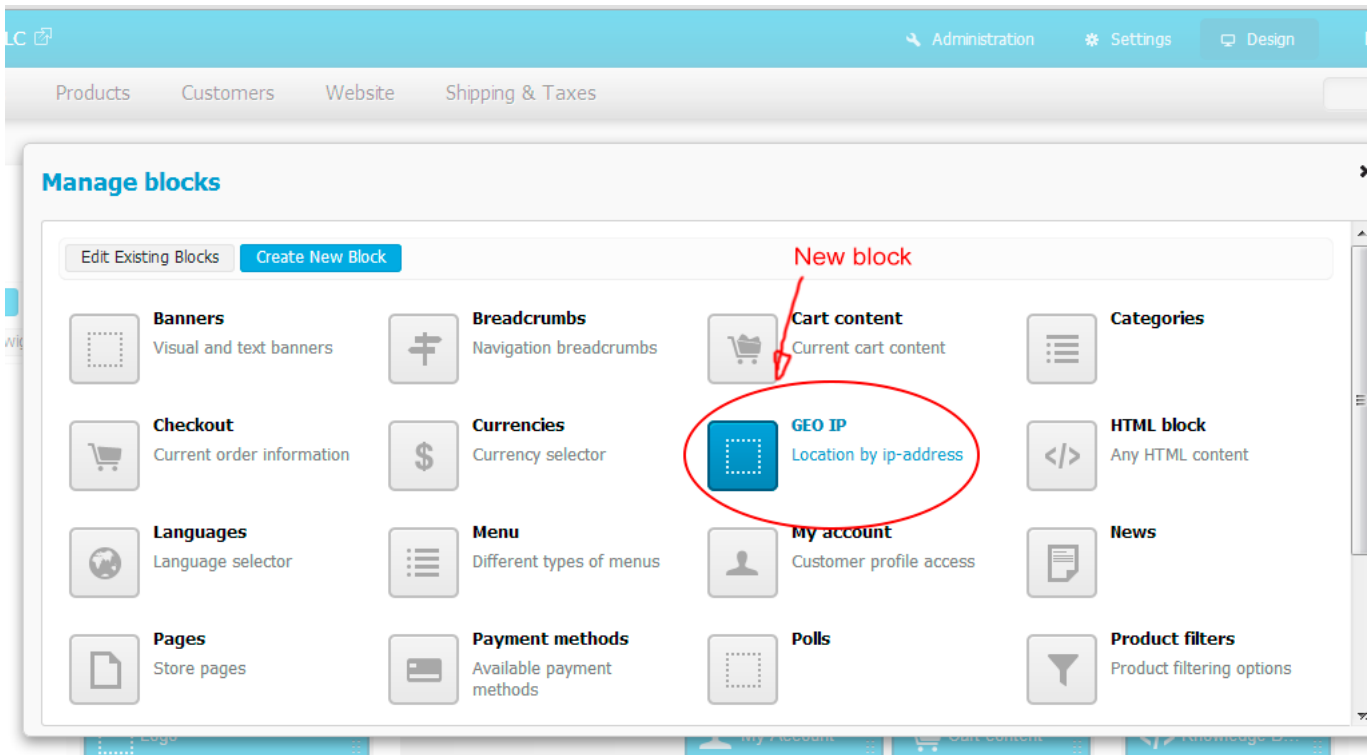

The add-on has only one setting: “Use ipgeobase.ru service”. This service locates cities of Russian Federation and Ukraine more accurate than *maxmid.com* base.

To configure add-on for usage of the service click “setting” next to the “Geo IP Location” add-on at the add-ons list (“Administration” → “Add-ons”). Then mark checkbox and click “Save” button.

**Note:** If *ipgeobase.ru* service will be unavailable *maxmide.com* base will be used instead.

## 5. Usage

If add-on installed and is active it already works. No additional action is required. Customer data will be pre-filled with location information automatically.

To display block with customer location information at storefront go to the “*Design*” → “*Blocks*” at the administration panel. Choose location that has to display customer location. Then click “*Manage Blocks*” button and choose tab “*Create New Block*”. At the tab appears new block named “*GEO IP*”. You can place this block at page like any other.
